IDENTIFIERS	*State University of New York

ABSTRACT

The 1982 annual report of the State University of New York on the age group and sex of students is presented. The major statistical tables array four student characteristics: age group, sex, level (undergraduate/graduate), and load (part-time/full-time). Part one contains summary data for the entire system and each institution within the system. For each of the headcount tables, there is a corresponding table providing percent distribution arrays of the headcount data. Part two contains headcount and percentage arrays of students by age group for each institution and institution type. Tables are available for undergraduates, graduates, and first-time students by load. Part three contains summarized historical trend data on all students from fall 1976 through fall 1982. In addition, trend data are grouped into sections by level (undergraduate/graduate/first-time), and each level has both headcount and percentage distributions for total, full-time, and part-time students. Additionally, age and sex trend data are displayed by level and load indexed to fall 1976. Two age groups are used to profile this trend data: those under age 24 and those age 25 and over. Finally, tables show change and percent of change in the age and sex trends by level and load from fall 1977. (SW)

PART VI- APPENDIX

Map of State University Institutions................................. 312

Publications List.. 314

INTRODUCTION

This is the ninth annual report published by the Central Staff Office of Institutional Research and Analytical Studies which provides comprehensive data on the age group and sex of students attending the State University.

The major tables included in this report array four fundamental student characteristics:

Age Group
Sex
Level (Undergraduate/Graduate)
Load (Full-time/Part-time)

The main body of this report is divided into five sections:

Part I	(Pages 1 - 152) - contains data for the entire system, as well as, each institution and institutional type. For each of the headcount tables in this section there is a corresponding table providing percent distribution arrays of the headcount data.
Part II	(Pages 153 - 196) - displays headcount and percentage arrays of students by age group for each institution and institution type. Tables are available for undergraduates, graduates and first-time students by load.
Part III	(Pages 197A - 244) - summarized historical trend data on all students from Fall 1976 through Fall 1982. The trend reports are grouped into sections by level (undergraduate/graduate/first-time). Each level has both headcount and percentage distributions for total, full-time and part-time students. The age and sex trend tables are not available for individual institutions, but are available for all standard institutional clusters.
Part IV	(Pages 246 - 278) displays age and sex trend by level and load indexed to Fall 1976. The data for this and the following section is divided into two age groups; those under 25, and 25 and over.
Part V	(Pages 279 - 311) displays change and percent of change in the age and sex trends by level and load from Fall 1977.

This report provides a number of tables which were not included in previous years. The most significant changes are the addition of percentage tables for each institution and the inclusion of Parts IV and V. These last two sections are particularly important because they provide insights into how enrollments have changed over the last seven years. Another new feature is the addition of the first-time undergraduates to the standard institutional reports. This represents a major improvement, in that this is the first time that these students have been broken out by sex and included as part of the general institution summary.

Part VI of the report contains a map locating the institutions of the State University, and a list of this office's publications.

We would like to thank those individuals on the campuses who are responsible for providing this office with timely and accurate data. The collection of this data required their extensive cooperation and continued effort. Our gratitude is also extended to this office's statistical staff of Mr. Spoor and Mses. Arat and Bossoni who were responsible for editing and verifying the data; the typing staff of Mses. Hart, and Sluus who prepared the final typescript and were responsible for the proper distribution of the publication.
